

GAGAN RICE MILL

TASTE OF PURITY

About Us

Gagan Rice Mill was established in the year 1999 with the core motive of producing rice of finest quality and purity thereby serving our end user with unmatched taste and ensure a healthy life. We strongly believe that the quality starts from the farms itself. Our permanent relations with farmers and the suppliers help us keep a strict control over processes & manufacture rice of premium quality.

India is one of the world's largest producers, as well as the leading consumer of rice. We feel proud to be in the business which helps us in contributing significantly in the growth of the nation's economy and also sit at the heart of so many dinner tables.

Uncompromised quality combined with a fair price and prompt delivery has etched our name in the market. Our widest range of rice includes all indian basmati and non basmati.

Vision

We envisage the vision to be the most trusted and preferred premium quality rice producer in the local & global market. Our aim is to enrich the legacy of Indian Rice in Indian and International market by building strong bonds via delivery of authentic flavor that meets the customer expectations using rich and technologically advanced processes.

Mission

Our mission is to deliver value to the customer, be profitable and establish leadership in core markets. The company strives towards partnering with farmers and the people in offering possibilities, productivities and excellent services, thus assisting all our valued clients in making best and economic choices as per their needs.

Quality

Procurement is the most important step when it is about ensuring quality. Thus, we lay the utmost stress on the entire process.

Gagan Rice Mill is well placed in terms of procuring paddy from the farmers. Being in the fertile land of Etawah, UP wherein the entire district is well fed by many rivers like Yamuna, Chambal, Sengar etc. help us ensure that the process of producing the best quality rice starts from the fields.

The systematic examination, checking and rechecking of paddy and rice to determine the fool proof quality of the end product is the hallmark of Gagan Rice Mill.

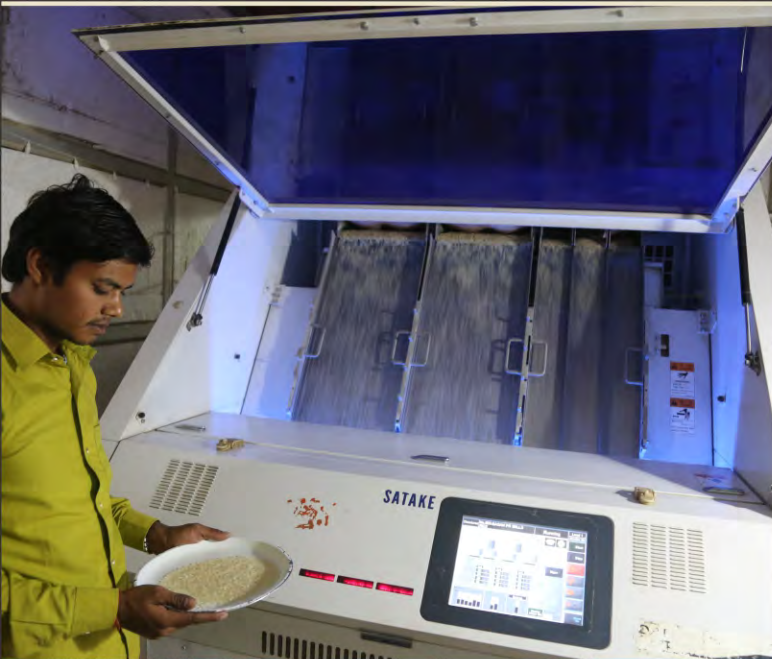

HiTech Infrastructure

Gagan Rice Mill has a hi-tech processing plant which confirms excellence at every stage. Any work of art is good as the expertise and infrastructure provided for its crafting. We have an excellent infrastructure for procurement, production, quality control and distribution of Rice.

Our physical laboratories are well equipped for quality management of samples, incoming materials, in process materials and outgoing materials. All the process has in stage and online quality approval and identification process.

Process

From selection of seeds to monitoring harvest and crop everything is done very professionally so that we can procure the right produce at the right price. Once the paddy grains are harvested, they are analyzed by the Quality Experts, who then hand pick the Best grains.

These selected grains then reach our Factories, where the Quality Control Department, after analyzing many parameters like Purity, Length, Aroma etc. send them to the Inventory Department.

Later the paddy grains are classified according to the parameters provided by the Quality Control Department. When the Paddy Grains are ready for Milling, it is cleaned and fed into our Latest Rice Milling Plants.

These plants are very sensitive and efficient. They mill the Paddy while maintaining the highest Hygienic conditions. Also, during the process of milling, main thrust is on protecting the Nutritional Value of the grains. After the milling process, Rice is cleaned and prepared for further processes.

The Process of Sorting out the Damaged or Discolored grains is a tough task, but with the use of Cutting edge technology provided by the leading machine suppliers like SATAKE(JAPAN), it is done flawlessly.

After removing the broken grains (if Required), the rice is ready to be packed. The packed rice is then stored in our godowns, from where the deliveries are made to the customers.

The systematic examination, checking and rechecking of paddy and rice to determine the fool proof quality of the end product is the hallmark of Gagan Rice Mill.

Why Us?

QUALITY

The quality of rice produced at Gagan Mills is comparable to global standards! It's highly premium, with uniform grains and great taste!

WIDE VARIETY

With us, you'd be spoilt for choice! We offer wide range of both Basmati and Non-Basmati rice under our product portfolio.
